---

## Q2

**30 percent**

The Commission has asked the Department to seek public comment on mountain lion hunting in Montana. The proposal is to allocate harvest between unlimited licenses that will end when a quota is reached and special limited licenses that hunt during the same period, but the special limited license would allow the hunter to hunt throughout the season without limitation by quota. Both the unlimited and special limited licenses would restrict the hunter to a specific hunting area. What percent of the harvest should be allocated to the special limited license hunters? (10, 15, 20, 25, or 30%)

---

## Q3

If special limited licenses are authorized by the Commission, should the special limited licenses be valid for an entire Region or valid in subsets of Lion Management Units (please indicate what subset of Lion Management Units should be grouped together)?

Your asking for our input yet only giving us answers your outfitter commissioner and director want us to give. The answer to #2 question is 100% but you excluded that option. This is a loaded questionnaire. Leave our lion seasons the way they are now.

In region 2 (Bitterroot zone) all stake holders, sat down together and worked out a solution, that all could live with. It was our Hybrid season, not the one your outfitter commissioner wants. This season structure has worked well for quite a few years now and should be left alone. I have to giggle at how disingenuous your questionnaire is.

Robert Wood  
Hamilton.

## Q3

If special limited licenses are authorized by the Commission, should the special limited licenses be valid for an entire Region or valid in subsets of Lion Management Units (please indicate what subset of Lion Management Units should be grouped together)?

Entire region. But that being said I disagree with all of this and feel as though it is poor management of the species. I have been lion hunting for almost 20 years in Montana and I think that the active lion hunters should all be asked what they think directly by wildlife managers. This should not be left to board members who do not hunt and outfitters.

Stop over complicating the regulations. Let the mountain lion population tell you what the quota should be per unit/district and continue as always. OR allow hunting with dogs to ensure you are killing the mountain lions that need to go. Stop making your booklet larger.....

Stop the war against all predators in Montana that have a direct ability to maintain our deer and elk herds at the "tolerated" level of acceptance. Why do we continue to lament elk herds that are over population (mainly on private land that does not allow public hunting) and still wage war on mountain lions, black bears and wolves? The reason is quite simple and stark - as "hunters" we don't like competition with a more effective predator than us when it comes to hunting deer and elk. Why does the commission continue to espouse expanding elk hunting opportunities because elk herds are over the socially accepted population limits and at the same time continue to expand the hunting of lions, wolves, and bears? The hypocrisy is startling in its untethered format.

**Q3**

If special limited licenses are authorized by the Commission, should the special limited licenses be valid for an entire Region or valid in subsets of Lion Management Units (please indicate what subset of Lion Management Units should be grouped together)?

Here we are again with the Wildlife Commission made up of outfitters who want special privileges. We went through this recently with the bull elk fiasco and Montana hunters overwhelmingly rejected special treatment for outfitters. Wildlife in Montana belongs to all citizens equally. It is a slippery slope if we start giving special treatment to a few individuals especially when the very people who benefit are sitting on the Commission that makes the decision. All mountain lion permits should be applied for equally by all resident hunters. I wanted to put that 0% of harvest should be allocated to limited license holders but the question above did not give me that choice.. Outfitters chose to go into the business. This should not give them a step up in applying for licenses. What the Commission is trying to do is special interest cronyism coupled with a conflict of interest for outfitters on the Wildlife 'Commission. Montana Hunters made it very clear that special consideration for outfitters is unacceptable. Outfitters should put in for permits just like every other hunter in Montana. No special consideration should be given to outfitters and any decisions related to this should force outfitters on the Wildlife Commission to recuse themselves from the self serving conflict of interest that this attempted policy presents.

I believe if the permits are for smaller areas it will spread out hunters and reduce conflict. I also believe that the current system in region 2 where the open quota starts at a later date is favorable.

## Q3

If special limited licenses are authorized by the Commission, should the special limited licenses be valid for an entire Region or valid in subsets of Lion Management Units (please indicate what subset of Lion Management Units should be grouped together)?

Entire Region. Why limit this, you are obviously attempting to reduce overall numbers but hey you can play here but do not cross the street!!!!

## Q2

30 percent

The Commission has asked the Department to seek public comment on mountain lion hunting in Montana. The proposal is to allocate harvest between unlimited licenses that will end when a quota is reached and special limited licenses that hunt during the same period, but the special limited license would allow the hunter to hunt throughout the season without limitation by quota. Both the unlimited and special limited licenses would restrict the hunter to a specific hunting area. What percent of the harvest should be allocated to the special limited license hunters? (10, 15, 20, 25, or 30%)

---

## Q3

If special limited licenses are authorized by the Commission, should the special limited licenses be valid for an entire Region or valid in subsets of Lion Management Units (please indicate what subset of Lion Management Units should be grouped together)?

Please only valid subsets of lion unit and leave the units in region 1 as is, they do not need to be grouped.

Subsets. Group 204, 240, 250, 261 and 270.

I have one major disagreement with new plan. Individuals that were unsuccessful in drawing the special limited license SHOULD NOT be restricted from purchasing the unlimited license. The split season in western montana has worked well.

## Q3

If special limited licenses are authorized by the Commission, should the special limited licenses be valid for an entire Region or valid in subsets of Lion Management Units (please indicate what subset of Lion Management Units should be grouped together)?

The special lion licence should be restricted to individual HDs that are reflected in the mountain lion regulations ( the way the regulations are in region 1, makes the hunter pick which HD to hunt in if drawn so areas do not get hit hard while others do not). The unlimited or general tags should be able to be used by region that way if snow is a issue a general/unlimited license holder can move around or pick better terrain fora oportunity at harvesting one if they wish, I think keeping this tag regional will also help with the so called "race". I think this is the best option to keep both sides the most contented.

**Q3**

If special limited licenses are authorized by the Commission, should the special limited licenses be valid for an entire Region or valid in subsets of Lion Management Units (please indicate what subset of Lion Management Units should be grouped together)?

I support this proposal but do have several comments. 1. First and foremost there are too many mountain lions and they are devastating deer and sheep numbers. We had two hard winters 2 years ago and deer/sheep numbers in western montana suffered. Lion numbers are as high as I have ever seen them. Lions where I hunt (Bitterroot, Rock creek, flint creek, clark fork) are way up and I havent seen this many lions since the 1990s. Lion quotas need to be significantly increased such that lion harvest can be significantly increased. For example area 210 is a large area and has a quota of 4. This is way way too low, the 210 area should have a quota of at least 10. Similarly area 211/216 has 8, which is rarely filled, but should have a quota of 15+. The lions are decimating the rock creek and anaconda sheep herds and deer herds. This FWP proposal to go back to the quota method for the majority of harvest is excellent, but must be done in conjunction with raising the lion quotas. 2. The special limited licenses should be for the current lion management units now (i.e. 210, 211/216, etc.). 3. If I apply for a special license and am unsuccessful, then I should be able to purchase an unlimited license. Why should this be limited. If cat hunters want to apply for the special tag and are unsuccessful, we want to be able to still hunt lions with a unlimited tag. Limiting this makes no sense me. Thanks Tim.

---

## Q3

If special limited licenses are authorized by the Commission, should the special limited licenses be valid for an entire Region or valid in subsets of Lion Management Units (please indicate what subset of Lion Management Units should be grouped together)?

No special limited licenses should be authorized. this is only giving a select few people to hunt Mountain lions. Lions are very Abundant throughout Montana and the number of deer and elk they prey on and kill is way more than anyone would believe. Hunting is, should be, a equal opportunity for all hunters. There should not be any special limited licenses nor should a general license be restricted to a specific region

---

## Q3

If special limited licenses are authorized by the Commission, should the special limited licenses be valid for an entire Region or valid in subsets of Lion Management Units (please indicate what subset of Lion Management Units should be grouped together)?

The special draw tag should be good for a whole management unit. I disagree with making a person choose a district for a unlimited tag. Lions cross into many different units and I think hunters should be able to hunt them in different units where the quota is still open to harvest.

## Q2

**30 percent**

The Commission has asked the Department to seek public comment on mountain lion hunting in Montana. The proposal is to allocate harvest between unlimited licenses that will end when a quota is reached and special limited licenses that hunt during the same period, but the special limited license would allow the hunter to hunt throughout the season without limitation by quota. Both the unlimited and special limited licenses would restrict the hunter to a specific hunting area. What percent of the harvest should be allocated to the special limited license hunters? (10, 15, 20, 25, or 30%)

---

## Q3

If special limited licenses are authorized by the Commission, should the special limited licenses be valid for an entire Region or valid in subsets of Lion Management Units (please indicate what subset of Lion Management Units should be grouped together)?

I would like commission to consider keeping the current regulations in region 2. I enjoy hunting in region 2 with my family because there is not the race. The so called race is not really conducive to having kids along and the current system is great for family hunting. Not just about the kill but having a good day in the woods as a family and possibly getting to see a mountain lion. I also believe the female quota in 283 and 285 should be reduced.

**Q3**  
If special limited licenses are authorized by the Commission, should the special limited licenses be valid for an entire Region or valid in subsets of Lion Management Units (please indicate what subset of Lion Management Units should be grouped together)?

we do not need a LMU, use the hunting districts that we already have, there is no need to have management units, that just complicates the rules and regs.

Valid only in subsets or unit.

All quotas should be lowed, quit blaming the lion because of the fwp's mismanagement of the mule deer.

Make will-call lion hunts illegal

**Q3** If special limited licenses are authorized by the Commission, should the special limited licenses be valid for an entire Region or valid in subsets of Lion Management Units (please indicate what subset of Lion Management Units should be grouped together)?

Why do you constantly feel the need to move hunters into smaller and smaller areas. This proposal makes it difficult for people like me who live on the line of 2 different regions to choose a hunting area. I help ranchers out with problem cats sometimes for other hunting permission and now I have to guess where that will be. You already ruined the elk hunting regs let's not do it to lions. The eastern part of the state and western part of the state are totally different hunting areas. Stop trying to make a one size fits all style of regs. It won't work

## Q3

If special limited licenses are authorized by the Commission, should the special limited licenses be valid for an entire Region or valid in subsets of Lion Management Units (please indicate what subset of Lion Management Units should be grouped together)?

Limited licenses should be valid for toms only. Also the limited license should only be valid in that district even during archery and fall season without dogs it's a permit for an area not the whole state. We also need more biology to some areas specifically region 7 this kill them all mentality needs to stop, the area is huge and lions are mostly taken out of a small portion so the quota should reflect that not a obscurely large quota we have now. If we have to pick our district to get our tag for why do we have a quota system at all.

**Q3**

If special limited licenses are authorized by the Commission, should the special limited licenses be valid for an entire Region or valid in subsets of Lion Management Units (please indicate what subset of Lion Management Units should be grouped together)?

I'll keep this short because after watching the live meeting on this topic, I am certain this comment will be summarily dismissed. It was obvious that the new Region 1 Commissioner Pat Tabor (and most of the others at the table) had ZERO interest in the public input, as Tabor spent much of his time playing with his telephone.

The current Region 1 lion regulations were put in place 16yrs ago to effectively manage the species and address the insanity of the "opening days races".

Since that time, it has worked extremely well on both fronts. Unfortunately we now have a commissioner that ignores public input and answers directly to the outfitting industry and its wealthy client base. His unwillingness to even debate retaining the current regulations tells me everything I need to know.

He simply FOLLOWS THE MONEY!

I am so angered by Commissioner Tabor's behavior that I and many others have vowed to work tirelessly to publicize and confront his inimical actions at every possible opportunity.

Sincerely Jay Sheffield

Vice President of the Libby Rod & Gun Club  
Past Member of the Region 1 FWP Citizens Advisory Board  
15 year Instructor FWP Hunter Ed & Bowhunter Ed

## Q2

**10 percent**

The Commission has asked the Department to seek public comment on mountain lion hunting in Montana. The proposal is to allocate harvest between unlimited licenses that will end when a quota is reached and special limited licenses that hunt during the same period, but the special limited license would allow the hunter to hunt throughout the season without limitation by quota. Both the unlimited and special limited licenses would restrict the hunter to a specific hunting area. What percent of the harvest should be allocated to the special limited license hunters? (10, 15, 20, 25, or 30%)

---

## Q3

If special limited licenses are authorized by the Commission, should the special limited licenses be valid for an entire Region or valid in subsets of Lion Management Units (please indicate what subset of Lion Management Units should be grouped together)?

We don't need to change the lion hunting for the guys in region 1 that are trying to protect their hunting. Leave the cat hunting alone there is nothing wrong with the lion hunting. Giving special tags to harvest lions even if the quota is met is ridiculous. The biologist have quotas for a reason so we don't over harvest and have lions to chase! Having to chose an area to hunt is ridiculous too especially for Montanans who want to travel to train dogs! If you want to do this for lions then you better do it for bear hunters with dogs as well so the region 1 hounds man can't come down here to region four to over run our area!

## Q3

If special limited licenses are authorized by the Commission, should the special limited licenses be valid for an entire Region or valid in subsets of Lion Management Units (please indicate what subset of Lion Management Units should be grouped together)?

I am not in favor of these proposals. I am not a fan of the quota system in general, and I would support more state wide specie licenses in all districts. I also see how this could be a compromise to both ends of the argument. If I had to choose I would want a region wide special license to avoid competition. Hound hunting seems to be more competitive and lions don't group together, so hunter dispersal shouldn't be an issue. I support region wide special license.

## Q3

If special limited licenses are authorized by the Commission, should the special limited licenses be valid for an entire Region or valid in subsets of Lion Management Units (please indicate what subset of Lion Management Units should be grouped together)?

Special limited licenses should be HD specific, however unlimited licenses should be region specific. Since there is concern about "the race" mostly by people that benefited from decades of opportunity, I believe that allowing region specific instead of HD specific unlimited licenses would provide more people the ability to at least get out with their houndsmen even if a popular HD closes early.

## Q2

**10 percent**

The Commission has asked the Department to seek public comment on mountain lion hunting in Montana. The proposal is to allocate harvest between unlimited licenses that will end when a quota is reached and special limited licenses that hunt during the same period, but the special limited license would allow the hunter to hunt throughout the season without limitation by quota. Both the unlimited and special limited licenses would restrict the hunter to a specific hunting area. What percent of the harvest should be allocated to the special limited license hunters? (10, 15, 20, 25, or 30%)

---

## Q3

If special limited licenses are authorized by the Commission, should the special limited licenses be valid for an entire Region or valid in subsets of Lion Management Units (please indicate what subset of Lion Management Units should be grouped together)?

I do not agree with this type of proposal. I thought the goal of the recent changes to the hunting regulations was to simplify them and make them easier to follow and understand? Having two different types of licenses for a single species running concurrently in the same units is exceedingly confusing and will be hard follow. Either go with an unlimited hunt with a quota that closes the season once it is reached, or go with a full draw tag with a designated season timeline. Not both.

## Q3

If special limited licenses are authorized by the Commission, should the special limited licenses be valid for an entire Region or valid in subsets of Lion Management Units (please indicate what subset of Lion Management Units should be grouped together)?

I think this whole thing is a sham! It's a way for a small number of people to make a big profit while the "regular" hunters will lose opportunities to harvest mountain lions because quotas will be filled by outfitters before anyone else can even get a chance to hunt. It will cause chaos in early season while everyone with dogs/tag will all be out hunting same districts, same cats, in a panic to harvest a mountain lion before quotas fill. I agree that permits should be increased, but keep the same permit system.

For the entire region. Make the quota as high as possible. It would be nice to give certain tags for female lions, not enough of them are harvested. Up the quota or give special permits that surround towns and especially places near schools. I'd like to see more females be taken out. Thanks

Subsets definitely! The current areas followed by lion districts would be adequate. The largest concern is that we need to open ALL lion regions to a quota. Our areas with open district are flooded with tag holding hunters and it's not right that permit areas see selective hunting while the rest of us are overrun. In NO way shape or form do we need unlimited tags for nonresident. It seems that our commission forgets the chaos that comes with this and I hope they're not so \$ driven they can recognize the need for restrictions!!!

I chose 10% because I was forced to make a choice to get to this point. Limited licenses should not be an option, lion quotas are set in place to scientifically control lion populations in each LMU. The limited licenses could be devastating to Mountain Lion population in any of the LMU's. Please vote against limited licenses for Mountain Lion.

## Q3

If special limited licenses are authorized by the Commission, should the special limited licenses be valid for an entire Region or valid in subsets of Lion Management Units (please indicate what subset of Lion Management Units should be grouped together)?

I kind of think region wide tags might work pretty good/ not sure... but if districts are grouped together as a subset, probably go 3-4 districts in a subset... for example 121, 122, and 123 together... at this point the region wide or subset is a bit of an experiment, if utilized it should be re-evaluated in 2-4 years to see how it's working.

Thanks  
Shawn Wengerd

## Q2

**30 percent**

The Commission has asked the Department to seek public comment on mountain lion hunting in Montana. The proposal is to allocate harvest between unlimited licenses that will end when a quota is reached and special limited licenses that hunt during the same period, but the special limited license would allow the hunter to hunt throughout the season without limitation by quota. Both the unlimited and special limited licenses would restrict the hunter to a specific hunting area. What percent of the harvest should be allocated to the special limited license hunters? (10, 15, 20, 25, or 30%)

---

## Q3

First of all this is definitely a push for non residents to kill more of our mountain lions! It's very disappointing that this commission keeps pushing for more non resident/outfitter/ money in everyone of their decisions instead of listening to the great majority of the residents of Montana who they most definitely work for! I can't believe history is about to repeat itself with these options. I guess 30% draw is the only option now. No person spends more time in the woods or has a better estimation of how many lions there are in an area then a houndsman who is out 2-7 days a week looking for cats! Disgusting is all I can say!

I'm only leaving a choice in the percentages option because this diabolical comment page won't let me comment unless I pick one. I disagree with the entire proposal! We had the unlimited license season years ago and it was an absolute crapshow! We went to a permit season for a reason, it works, and should have been left alone. I can't believe for a second that anyone would want to go back to that. Shame on FWP.

**Q3**  
If special limited licenses are authorized by the Commission, should the special limited licenses be valid for an entire Region or valid in subsets of Lion Management Units (please indicate what subset of Lion Management Units should be grouped together)?

Firstly I think at least 50% of Licenses should be special limited licenses and should be for specific areas. The unlimited quota licenses could be regional.

**Q3**

If special limited licenses are authorized by the Commission, should the special limited licenses be valid for an entire Region or valid in subsets of Lion Management Units (please indicate what subset of Lion Management Units should be grouped together)?

Its obvious the decision has already been made, but here's a few things you're going to need to address once this outfitter and guide proposal is crammed down Montanan's throats.

You speak of a general tag being used during the archery and rifle season, but in the proposal there will be no general tag option so you'll have to clean that verbiage up.

You can drop the whole word "Special" as its no longer necessary if the Commission adopts this statewide. They would just be Unlimited Lion Licenses and Limited Lion Licenses

You should maintain the ability to purchase a bonus point even if you get an Unlimited Lion License so that someday you can apply for the Limited Lion License and have a chance to draw it.

So if you apply for a Limited Lion License and don't draw you won't be able to hunt lions anywhere in the state during the winter season, that's not going to work for anybody except non-residents who don't live here and don't care to hunt another way if they didn't draw. That's not fair to residents to take away all our opportunity. That's like saying if you apply for an elk tag and don't draw it, you can't hunt elk that year. Are we living in Utah now? Please, lets craft proposals that are fair for residents and not crafted to specifically benefit non-residents and outfitters.

This will unleash nonresidents on the western part of our state again and allow them to kill in excess of half or more of our lions with the help of Montana's outfitting industry which is exactly why we have limited licenses in Region 1 and the hybrid season in Region 2. Now we're just going to open the headgates to nonresidents and outfitters again. It didn't work before and it won't work again because it's not equitable to residents who live and hunt here in Montana. The hybrid season Region 2 has works great to provide both equity and balance and manages lion populations appropriately.

As to the subset of lion management units, the larger the area, the less the outfitters with all their nonresident clients will be able to close an area up in a matter of a few days or a few weeks ending the resident's entire season in the blink of an eye.

There is not reason to change the mountain lion structure. this is all to placate outfitters. If the goal was to truly increase harvest, simply increase the number of tags issued. 100 percent of the tags should be limited license hunters.

Region wide draw tags seems like it would be a good way to go!

Please consider going with 25 or 30% of total tags allotted to the draw, anything less would be less than fair consideration to the decent number of people that wanted to keep the draw system the way it was...

also please keep the Lion bonus points that we already have...!

Thanks

Delonte Wengerd

The harvest of lions needs to remain 100% permit only where applicable and the local and regional biologists need to have the ability to adjust the male and female harvest. Please do not go back to a system of a quota that we got away from for a reason. Sportsmen and biologists spoke very clearly years ago and Commissions listened. Do not go back in time to a Quota.

The Commission has asked the Department to seek public comment on mountain lion hunting in Montana. The proposal is to allocate harvest between unlimited licenses that will end when a quota is reached and special limited licenses that hunt during the same period, but the special limited license would allow the hunter to hunt throughout the season without limitation by quota. Both the unlimited and special limited licenses would restrict the hunter to a specific hunting area. What percent of the harvest should be allocated to the special limited license hunters? (10, 15, 20, 25, or 30%)

---

## Q3

If special limited licenses are authorized by the Commission, should the special limited licenses be valid for an entire Region or valid in subsets of Lion Management Units (please indicate what subset of Lion Management Units should be grouped together)?

I believe the special limited licenses should be for specific management units or groups of units but not for the entire region. The is too much variability through an entire region to set quotes properly. I also believe the there should be a cap on the amount of unlimited special licenses that can be sold to nonresidents. allowing the tag to be over the counter to nonresidents would greatly increase the amount of guiding to nonresidents and would flood the units with out of state hunters and guides filling quotas fast and leaving less of a chance to the residents that choose to purchase that unlimited special license. Thanks

The system we currently use works very well in region 3,4,5,6,and7. There is no biological reason to change it. This is a terrible proposal for lions and lion hunters. Change region 1 and 2 to a general tag and quota, and leave the rest of the state alone

**Q3**  
If special limited licenses are authorized by the Commission, should the special limited licenses be valid for an entire Region or valid in subsets of Lion Management Units (please indicate what subset of Lion Management Units should be grouped together)?

The units shouldn't be bundled.

This new proposal should be not be used at all, the same thing and same proposal was HB 142 used in 2001, 02, 03 and 04, it failed, with the outfitters bringing in unlimited non residents and the were over runs and the RACE. This proposal commissioner Tabor & MOGA are slamming this down our throats is about making money. We cannot pass this new proposal, I am telling you, we will back here within 2 years trying to fix this. The fact that we have been here before is ironic, the experience that us older houndsmen in this state is that the FWP needs to listen to the houndsmen and the boots on the ground. Remember commissioner Tabor has only been here since 1999, remember that he owns a outfitting business, remember he in did not remove his own BMU 130 from the bear proposal that was tabled. What he is doing isn't representing region 1, it represents his own interests (his outfitting business & MOGA), there is a huge conflict of interest. I am asking the commission to leave Region 1 as status quo with limited lion permits, that has worked for the last 16 years.

Thank you,  
Terry L. Zink 3rd generation houndsman

## Q3

If special limited licenses are authorized by the Commission, should the special limited licenses be valid for an entire Region or valid in subsets of Lion Management Units (please indicate what subset of Lion Management Units should be grouped together)?

The special limited licenses should be limited to each individual LMU. The reason for this is because I have no data on quota numbers for the next season. I would also defer to the biologists to find out what management strategy (macro vs. micro) for the regions and LMUs is most beneficial in maintaining a balanced population of cougars. Thank you for your time.

The special lion license should only be good for LMU s  
LMUs in region two were previously grouped, example being 200,201 grouped and 202,203 grouped

## Q3

If special limited licenses are authorized by the Commission, should the special limited licenses be valid for an entire Region or valid in subsets of Lion Management Units (please indicate what subset of Lion Management Units should be grouped together)?

The real question is whether special limited licenses should be issued at all and in response to that question, which should be the first question asked, I would say NO! Special limited licenses is a very bad idea and likely is designed for only a special few, perhaps land owners or outfitters and their friends/clients, excluding the rest of the Montana hunting population. Plus, unlimited seasons for special licenses means that hunting can be allowed when hunting should be limited, like when the females are with cubs and the like. Special limited licenses are simply a bad idea and contrary to the overall mission of the Department. I accidentally hit the 10% button, before realizing that there was not way to express a 0% to the number of licenses which should to considered and also discovering that once you had answered there is no way to correct that error and remove any percentage selected. Please note that despite the figure above, I would have the Department issue no special limited licenses.
